

News Release - 16th June 2008

Partner Electronics joins the Northamptonshire Chamber of Commerce.

Partner Electronics has joined the Northamptonshire Chamber of Commerce. This will give the company an invaluable opportunity to work more closely with businesses in Northamptonshire and surrounding areas.

It is hoped that the company will be able to use the Chamber's networking opportunities to raise awareness of the Partner Electronics capabilities in electronic design services and to the many industries in and around Northamptonshire. As a growing county, Northamptonshire is home to many businesses and many are technology-based.

Although Partner Electronics works with organisations across the UK, we have chosen the Northamptonshire Chamber of Commerce initially because we are based in the south of the county. This is an area in which Chamber has recently begun to expand its activity. We wish them every success in their endeavours and hope that we can contribute to their success and the success of our fellow members.

Partner Electronics is a design company that works closely with its technical customers to achieve results as fast and as cost effectively as possible.

Partner Electronics was formed in 2007 by a group of experienced engineers who sought to provide an innovative resource to engineering teams. It is wholly owned by the directors and is totally independent.

Our aim is to provide a more flexible and cost-effective option to engineering and project managers who need additional resource and skills to complete their projects. From our experience of managing projects we know that particular skills are required at varying levels during a project and we are set up to provide those resources in a flexible way.

The company has grown and in February 2008 moved into offices at Silverstone Innovation Centre which provides the base for further growth.
